SLICs

Covers, on your phone

The week's cover jobs, your place on the pick list and your call-in time, in the SLICs app. It's read from the on-call sheet, so you can look any time without opening the sheet.

Get verified, once

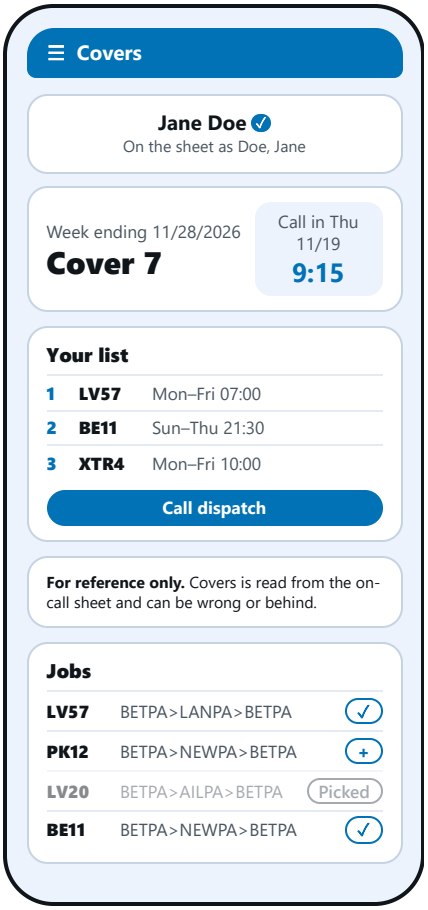

Covers is for drivers on the on-call sheet, so an admin checks who you are before it opens.

1. **Scan the code and sign in.** New to SLICs? **Continue with Google** sets you up, or tap **Create one** to use an email and password. It's free and there's nothing to download.
2. You land on **Covers**. If you don't, open the menu (three lines, top left) and tap it. Then tap **Verify I'm a driver**.
3. Type your **Name** the way the on-call sheet writes it, your **UPS email** (your employee ID @ups.com) and your **Seniority date**. Tap **Send**.
4. An admin checks it against the on-call sheet. Once you're verified, **Covers** opens and a check mark shows next to your name.

Nothing is sent to your UPS email. Only admins see what you send, and your employee ID and seniority date are deleted once an admin decides.

What you'll see

- **Your place and call-in time** for the week being bid, like "Cover 7, call in Thu at 9:15".
- **Every cover job you can bid on,** with each day's start time and the route. Taken jobs are grayed out. Nobody sees who took a job.
- **Your list.** Tap **+** on the jobs you want and put them in order. Taken ones drop off on their own. At your call-in time, tap **Call dispatch** and read it off.
- **Reminders, if you want them:** before your call-in, when a job on your list is taken, and when the week's jobs are posted or change. Turn on **Notifications** in your profile.
- **Your week,** on your profile: the job you're working or covering, with start times and route.

An example: every name, job and time is made up.

Good to know

- **Covers is for reference only.** It's read from the on-call sheet and can be wrong or behind. Your list isn't a bid: you still pick by calling dispatch at your call-in time.
- **It's private.** Other drivers never see your list, your place or your status.
- **Something doesn't match the sheet or dispatch?** Tap **Report a problem** above the jobs. Not on the week's list and should be? Tap **This is a mistake**.
- **iPhone:** reminders only work with SLICs on your home screen. In Safari, tap Share, then **Add to Home Screen**.
